

Expand the Broadband Revenue Opportunity

Electric cooperatives across the country are expanding their mission to include broadband in the essential services they deliver to members in rural and underserved markets. Over 200 co-ops now deliver broadband to their members; however, broadband alone is not enough for you or your customers. Phone services provide a margin-rich revenue source for cooperatives and creates a broadband multi-play offering that boosts customer loyalty.

With voice-broadband adoption rates at 20-40% and margins that can be 65% or more, adding phone services can have a material impact on the financial health of your ISP endeavor. Serving residential and business members with modern voice and high-speed Internet services, cooperatives also spur economic growth in their local communities.

Easy-to-Launch VoIP Solution

Alianza's cloud VoIP solution enables electric cooperatives to further monetize their broadband networks with easy-to-launch residential and business cloud communication services.

Alianza's cloud communications platform provides a comprehensive, tightly integrated VoIP solution that is easy to manage and provides a success-based business model to maximize margins and reduce risks.

Unlike complex softswitches or inflexible white label hosted solutions, the cloud communications platform gives co-ops control and simplicity to succeed and create an excellent customer experience. Based on state-of-the art web-scale cloud native technology, the cloud communications platform provides electric cooperatives with a future-proof and agile VoIP solution.

68%

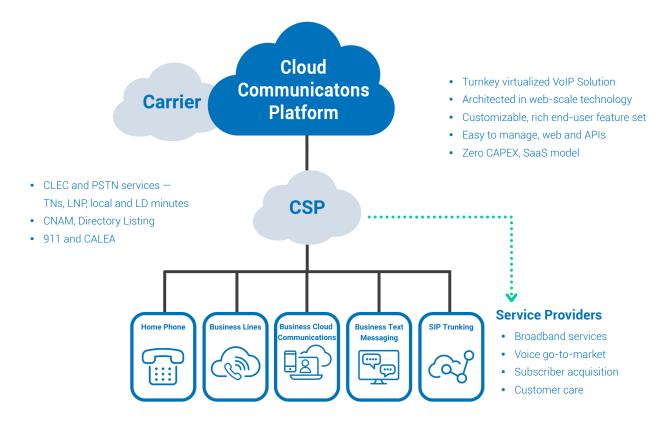

of broadband subscribers get a bundle of services1

87%

of SMBs would prefer purchase phone and cloud communications from their broadband provider, if the VoIP features met company requirements.
